Menſe Michael. } { Quind. Martinj.

Note alſo that the Exchequer openeth Eight dayes beforꝛe any Tearme begin, (except Trinitie Tearme) in which it openeth but foure dayes beforꝛe.

¶ A Deſcription of the Foure Quarters of the Yeere.

Of Winter Quarter, the Sun in ♑. ♒. ♓.

THE vſual winter quarter for this yéere of our Lord God, 1619, began the 12. day of December laſt 1618. when the ſun entered into the firſt minute of Capricorne, and ſhall continue till the 12. day of March following ſo that the firſt part of the Aſtronomicall Winter is in one Politicke yéere, and the latter end thereof is in the other. This ſeaſon of its owne naturall diſpoſition is knowne to be cold & moiſt, contrary to the quallity of Summer. In this quarter of the yéere the naturall heat of man is drawne inwards, and the extreame parts grow cold, wherfore that body that is healthfull and hath a good digeſtiue faculty, may feed more freely and take meat in more plenty then either the Spring-tide or Summer ſeaſon will allow,

As concerning the weather, it is likely to bee extreame both in froſt & ſnow, and cold raine vntill Candlemas

dicmas, and then not to be so variable and extreame, but more temperate, and the last part thereof to be faire enough.

The Sicknesses that are like to invade our bodies this quarter, are feuers of all sorts, Rhumes, Catars, Coughs, Hoarsenes, Palsies, Appoplexies, paine in the head and belly, paines in the Thighes and knées, Dropsies, weakenesse and paine in the Backe, griefe in the Brest, Stomack, and Lungs, with many other diseases too long to be rehearsed.

The Second Quarter of this Yeare called the *Spring*, *The Sun in* ♈. ☉. ♊.

The Sun hauing finished at full the Winter quarter with the last part of Pisces, maketh his entrãce the 11. of March, whẽ the Sun entreth into the first minute of Aries the equinoctial signe, making the equinoctiall point so that then the day & the night is equall. This season naturally is hot and moist, the most temperate and healthfull time of all the yéere, not apt to bréd any sicknes, but to produce and bring forth such as hath béene ingendred in the body already at other times. The reuolution of this quarter doth threaten many dangerous Agues, also strife & debate amongst rich men, forging and spredding of Newes. This Quarter is hot and moist, resembling the Element of the Ayre and sanguine complexion.

As for such diseases which are likely to be common this quarter, Coughes, paines in the sides, tertian Agues, Vertigo, and Swimming in the head, Scabs Itchings, Measels, and small Poxe, paines in the eyes, paines in the Diaphragma and Lungs, sundry fluxes

Fluxes, Swellings, and ach of the Joynts.

Of the Third Quarter of the yeare called *Summer*, *The Sun being in* ☌. ☊. ♍.

The third part of this yeere called Summer, alwaies taketh his beginning when the Sunne entreth into the first minute of Cancer, which causeth the longest day and shortest night in all the yeere, which will now happen the 11. day of June, and will continue the Summer quarter vntill the 14. of September following.

This quarter naturally is hot and dry, and by that meanes worketh in the bodies of men diuers alterations causing many hot chollericke diseases, stirring vp men to contention, quarrelling, warre and conspiracies. The reuolution sheweth that there shall be many robberies, spoyling and violent oppression & taking away of mens goods violently and wrongfully, with Imprisoment and other trouble that shall happen vnto them otherwise.

The sicknesses of this season are generally hot Feuers, Tertians, continuall and malignant Agues, Pluriſies, spitting of bloud, Diarheas, Fluxes of sundry sorts, sores in the mouthes, Shortnesse of breath, paines in the stomacke & belly.

Of the Fourth Quarter, of the yeare called *Autumne* or Harueſt ſeaſon, The Sunne *being in* ♎. ♏. ♐.

HArueſt or the fal of he leafe, is the laſt part of the yeere Aſtronomicall, which is the moſt profitable ſeaſon of the whole yeere, and doth begin when the Sun entreth into the firſt minute of the ſecond Equinoctiall ſigne Libra, which will be this yeere the xiiij. of September, at which time the day and night is of equall length, as before in March.

The diſpoſition of this ſeaſon is alwaies inconſtãt and variable, by which meanes it is the nurſe & foſter of moſt Sickneſſe that do happen in the ſpring. Concerning which diſeaſes, thoſe that are likely to happen, they are Quartan Agues, Blacke Jaundies, Conſumptions, Dropſies, Stranguries, the Gout, ſmall Poxe and Meaſells, with many other like diſeaſes: Wherefore haue a regard to the diet, that they may liue the better in health.

The

The changes of the Móone, with their Quarters and Fulls: Alſo what weather is like *to be at that time.*

Ianuary. 1619.

NEw Moone the 5 day at 7 of the clocke, and 27. min: in the afternœne, like to be a froſt.
